## CONDITIONS OF SALE

PRICES given in this list are intended for wholesale trade only, and cancel all previous quotations. They are based on current conditions and therefore are subject to change without notice.

### TERMS:

1. Cash with Order.
2. Half of amount remitted with order, balance C. O. D.
3. Charge Accounts. To firms whose credit has been established with us, strictly 60 days net from date of invoice. Interest may be charged at 6% thereafter. When opening a new account, time may be saved by forwarding bank and trade references.

PACKING at cost will be charged above prices quoted. Paper pots, when used, will be charged extra.

SHIPPING instructions are requested. Whenever possible we will pool smaller orders in carloads to near vicinity, thus saving on freight and boxing costs. Early placement of orders is essential in insuring accommodation in our pool cars.

CLAIMS or COMPLAINTS should be made within 10 days of receipt of shipment, and in the case of breakage, must be accompanied by a copy of the Report of Damage furnished by an inspector for the carrier at time of delivery of shipment.

CAMELLIA COL. FIREY

# CAMELLIAS

CAMELLIA PINK STAR

## LINING OUT—Named varieties.

We specialize in growing Camellia lining out stocks for the trade. With plants in our test gardens collected from many sources, we now offer more than 200 varieties commercially, for growing on. Properly grown and properly packed for shipment, D & D Camellia liners are a leading money maker for a large section of the United States today.

A separate list of grafts and cutting grown plants, with descriptions, will be mailed upon request. Shipping begins in September and continues through April.

## BALL & BURLAP—By color only.

There is still a good demand for Camellias by color rather than by variety. For this trade we offer balled plants with flower buds, in red, pink, and variegated, as follows:

## OREGON NATIVE TREES AND SHRUBS

Our collected natives are selected and collected by trained, experienced foresters and nurserymen. Our methods of selecting and handling these plants have proven successful to the extent that our collected plants have succeeded as well as nursery grown stock.

These trees and shrubs are collected from the peat bogs of southwestern Oregon. They are dug in such a manner that the peat and native soil forms a ball which is so solid that the plants can be shipped and handled without wrapping.

### MADRONA (*Arbutus menziesii*)

A stately broad-leaved evergreen tree from thirty to ninety feet tall.

Flowers, white, urn-shaped. Fruit, red, borne in clusters. Likes full sun.
